

# Getting Great Requirements

This *Interactive* Workshop Explores the Techniques for Gathering Great Requirements

**Workshop Summary:** This full-day, hands-on, practical workshop focuses on how to improve the quality of your project or program requirements gathering process. We share best practices and techniques which can be used immediately to increase project effectiveness and business results.

We kick off the day by describing the requirements elicitation process within the context of requirements engineering best practices. We then explore various techniques for gathering both functional and non-functional requirements as well as the connection between usage models, use cases, and good requirements. By the end of the workshop, you will have a practical process to take back to your organization for gathering high-quality project and program requirements.

## Who should attend?

Anyone who contributes, writes, reviews, or verifies project or program requirements. Project and Program Managers, Product Managers, Engineers, Marketing personnel will all benefit from this course.
